

VINCI

Strategic Engineering for Advanced and Regulated Manufacturing

Who We Are:

VINCI is an engineering and strategic consulting firm specialized in advanced manufacturing, industrial automation, advanced simulation, regulatory compliance, and execution of complex projects for highly regulated industries.

With more than 11 years of operation and more than 27 years of accumulated experience as a group, we support national and international companies in expansion, automation, industrialization, technology transfer, and operational modernization projects.

Our approach integrates engineering, automation, simulation, and compliance to reduce risks, accelerate implementations, and develop scalable operations aligned with international standards.

INDUSTRIES

Medical Devices	Technology Transfer Industrialization FDA / ISO readiness New production lines Integration and automation
------------------------	---

Pharmaceutical	GMP compliance Validation Plant design Conceptual HVAC Process integration
-----------------------	--

Food and Beverage	Throughput optimization Packaging automation Capacity simulation OEE improvement HACCP readiness
--------------------------	--

Personal Care	Automation Line integration Operational scaling New products
----------------------	---

Aerospace	Advanced manufacturing Process integration Compliance and traceability Compliance and traceability
------------------	---

Mining and Logistics	Industrial automation DC (Distribution Center) design Logistics simulation Operational optimization
-----------------------------	--

Strategic Engineering for Advanced and Regulated Manufacturing

SERVICES

Engineering and Design	Conceptual and detailed design Plant and layout design Mechanical and industrial design Product and device development Station and equipment design
-------------------------------	---

Automation and Integration	PLC / HMI / SCADA MES / ERP integration Industrial automation Production line integration Machine vision and traceability
-----------------------------------	---

Advanced Simulation	Throughput analysis Bottleneck analysis Capacity simulation Digital twin concepts What-if scenarios
----------------------------	---

Compliance & Validation	FDA / GMP / ISO readiness Validation support Machine safety Occupational health Compliance-driven engineering
------------------------------------	---

Technology Transfer	Technology transfer NPI support Industrialization Operational scaling
----------------------------	--

Project Management	PMO support FAT / SAT oversight Multidisciplinary coordination CAPEX execution support
---------------------------	---

Strategic Engineering for Advanced and Regulated Manufacturing

EXPERIENCE

Our team has participated directly and indirectly in projects for organizations such as:

- Abbott
- Boeing
- Ingenya
- Haleon
- Unilever
- Kimberly-Clark
- Procter & Gamble
- Amazon
- Costa Rican Social Security Fund (CCSS)

Participating in initiatives related to:

- Plant design and expansion
- Industrial automation
- Production line integration
- Manufacturing simulation
- Product and device development
- Validation and compliance
- Technology transfers
- Distribution and logistics centers

VALUE PROPOSITION

VINCI combines engineering, automation, advanced simulation, and regulatory compliance into a single strategic partner, enabling our clients to reduce risks, accelerate implementations, and develop more efficient, automated, and scalable operations.
